EQUIPMENT

Faulkner Plastics is housed in a 20,000 square foot facility that is fully equipped to service all your plastic needs. Our state-of-the-art equipment is second to none in the industry. Our vast variety of machinery provides us the capability to handle mass production jobs efficiently and detailed custom jobs with fineness resulting in the product quality you expect no matter the size of the job. Descriptions of our large machines can be found below:

Mimaki JFX200 48" x 96"
This wide format flatbed UV digital printer has the capability to print onto thick substrates, it offers the ability to produce a diverse range of prints.

Gabbiani Galaxy 90
14' computerized panel saw
The Galaxy is capable of making straight cuts accurate within .006 in. in material up to 5 in. thick.

Schelling fk4
14' computerized panel saw
This saw can be used for all types of material, offers the highest degree of precision cutting up to 3.5" thick.

KOMO VR 508 60" x 96"
CNC router
The Komo is capable of cutting AutoCAD files out of material up to 2" inches thick; typically used to cut out signage letters, decorative shapes, or complicated components.

SCM Pratix N15 CNC router
60" x 144" CNC router. The Pratix is capable of cutting AutoCAD files out of material up to 2" inches thick.

L-Star 450 Watt Laser
Cutting System 80" x 120"
Vitek Laser's L-Star 450 Watt is a high performance Laser Cutting System and sets the industry standard for versatility, productivity all while delivering unrivaled throughput for both cutting and engraving applications.

Epilog Legend 36ext
Laser Engraver
12" x 24" x 36" 120 watt digital laser engraver. The Epilog is capable of engraving, etching, or cutting digital files into almost any material.

Weeke ABP 310
Our ABP 310 is a diamond edge polishing machine, designed and customized for the plastics industry. The Weeke features a 10' working table as well as the ability to tilt the processing head to apply chamfers.

Quincy precision
thermoform oven
48" x 96" x 108" forced air convection oven. The oven is used to uniformly heat material to thermoform various types of plastics.
